

MARTIJN FL LANDSCAPE ARCHITECT

LAND SCAPE

After twelve years of experience at various renowned landscape architecture firms in the Netherlands, I started out as a independant landscape architect in 2011. Working at OKRA, Veenenbos & Bosch and Rijnboutt has given me considerable experience in garden, landscape and urban public space design. Among other things, I have worked on the redevelopment plans for the Egmond aan Zee boulevard, on the outdoor spaces of a neighbourhood in Gouda and on landscaping Apeldoorn's rehabilitation facility for the blind and partially sighted.

Previous projects of my company include a design for the Keizer Karel Square in Nijmegen, which was awarded 1st prize; a demo garden design that was realised in Appeltern; and shortlisted designs for furnishing the Vondelpark in Amsterdam and for expanding the village of Allerød in Denmark. In 2012 I received a grant from Creative Industries Fund NL for a joint research project into the future of the IJssel lake area.

My mission is to reinforce the expressive power of landscapes and urban public spaces. I strive to create clear concepts rooted firmly in the landscape's idiosyncracies and history. My designs lend weight to the character of a site while offering ample practical space. They are sustainable and capable of developing and adapting as time goes by.

PROJECTS

1 Temporary use of space

2 Public space design

3 Landscape

4 Urbanism

5 Gardens

Project

Temporary lay out for Blokhuisplein

Client

Municipality of Leeuwarden

Project team

Martijn Al in cooperation with
Peter de Ruyter (contractor)

Status

first fase realised in 2013

2

PUBLIC SPACES DESIGN

Project

Public space design Oosterwei

Client

Municipality of Gouda

Contractor

Rijnboutt

Project team

Martijn Al, Richard Koek

Status

realised in 2011 - 2012

Project

Design research into a climate-resistant IJsselmeer area

Design

All across the globe, deltas are subsiding due to diking, poldering and the deepening of navigation channels. Our vision for the IJssel delta offers inspiration for a more sustainable approach to these sinking deltas, ensuring their liveability even in the very long term.

Client

Creative Industries Fund NL

Project team

Martijn Al, Jorryt Braaksma

Sounding board

Erik van Slobbe (researcher Alterra), Bert van der Valk (geologist Deltares), Norbert Dankers (estuariën ecologist Dankers Coastal Zone Management)

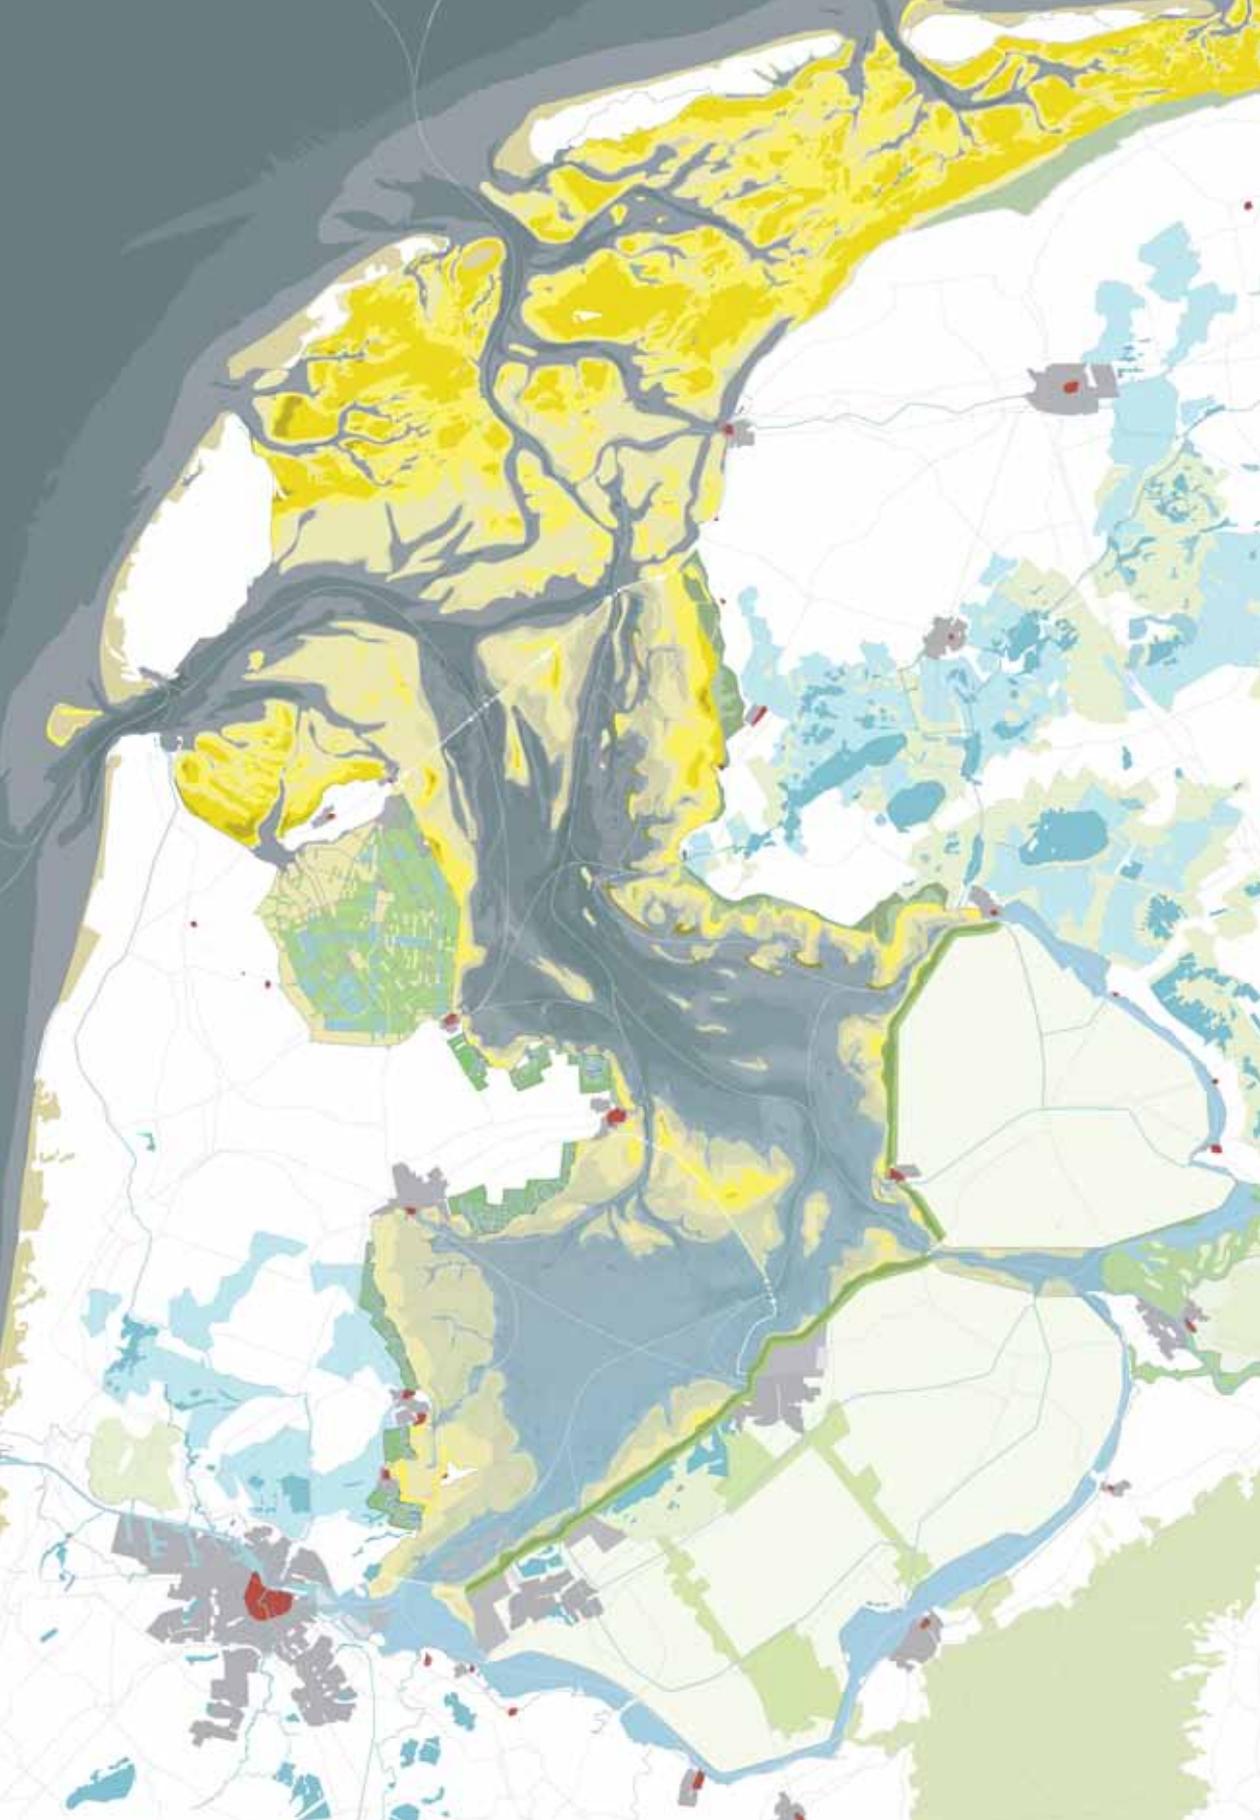

Model study

Mick van der Wegen and Ali Dastgheib (researchers UNESCO IHE)

Status

Design research, 2013

Project

Expanding the village of Allerød, Denmark

Design

Landscaping and urban design for expanding the village by 600 houses. To stem the urbanisation of the intermediate landscape, our design proposes to add a park that functions as the new social heart of both the expansion area and the two existing villages.

Client

Competition European 11

Project team

Martijn Al, René Kuiken (urban designer), Cecilia Gross (architect)

Status

Shortlisted

5

GARDENS

Project

demonstration garden 'Beach Garden'

Client

Tuinen van Appeltern

Project team

Martijn Al, Arjan Kool

Status

realised in 2005
